

Checklist for Resolving an External Webcam Not Detected in Zoom (Windows10)

1. Check the Physical Connection

- **Ensure the webcam is properly plugged into the USB port. Try a different USB port if necessary.**

2. Verify the Webcam in Device Manager

- **Open Device Manager → Cameras or Imaging Devices.**
- **Check if the webcam appears and has no warning icon. Update or reinstall the driver if needed.**

3. Check Windows Camera Privacy Settings

- **Go to Settings → Privacy → Camera.**
- **Make sure Camera access for this device and Allow apps to access your camera are turned on.**

4. Confirm Zoom Has Camera Permission

- **In Settings → Privacy → Camera, ensure Zoom is allowed to access the camera.**

5. Select the Correct Camera in Zoom

- **Open Zoom → Settings → Video.**
- **Choose the external webcam from the camera drop-down list instead of the built-in camera.**

6. Close Other Applications Using the Camera

- **Exit apps such as Teams, Skype, OBS, or browser tabs that may be using the webcam, then restart Zoom and test the camera again.**

If the webcam is still not detected, restart the computer and check for Windows, Zoom, and webcam driver updates.
