Task 4

DHCP RANGE

- **Starting IP Address:** (e.g., 192.168.1.100)
- **Ending IP Address:** (e.g., 192.168.1.199)

The addresses between these two numbers make up your network's **DHCP Range**. In this example, your router will automatically hand out up to 100 unique IP addresses to any phones, laptops, or smart gadgets that connect to your Wi-Fi.
