

Step 1: Change the Desktop Wallpaper

1. Click the **Apple menu** () in the top-left corner of your screen and select **System Settings** (or *System Preferences* on older macOS versions).
2. In the left-hand sidebar, scroll down and click on **Wallpaper**.
3. On the right side, you will see various categories like *Dynamic Wallpapers*, *Light & Dark Desktop*, *Pictures*, or *Colors*.
4. Click on any wallpaper image you like. The desktop background will instantly update to show your new selection.

Step 2: Adjust the System Language to Hindi or Gujarati

1. While still inside the main settings window, look at the sidebar on the left and click on **General**.
2. From the sub-menu on the right, click on **Language & Region**.

macos settings language and region screen

3. Look at the **Preferred Languages** section at the top. Click the **plus (+) button** right below your current language.

4. A pop-up menu with a search bar will appear. Type "**Hindi**" or "**Gujarati**" into the search field.
5. Select your chosen language (e.g., *हिन्दी / Hindi* or *ગુજરાતી / Gujarati*) from the list and click **Add**.
6. macOS will prompt you with a message asking: *"Would you like to use [Language] as your primary language?"*
7. Click **Use [Language]** to set it to the top of your list.

Step 3: Apply the Changes

For the language changes to take full effect across all applications, Finder windows, and menus, you will need to restart your Mac:

1. A prompt will usually appear asking to restart now. Click **Restart Now**.
2. If it does not prompt you, click the **Apple menu** () in the top-left corner manually and select **Restart...**
3. Once your Mac boots back up, your interface text will be updated to your chosen language.
