

Here is how to connect a USB webcam, handle the setup, and capture a test photo:

Step 1: Plug it in

- 1. Secure the webcam on top of your monitor or laptop screen.**
- 2. Plug the webcam's cable into an empty USB port on your computer.**

Step 2: Driver Installation

- Modern operating systems feature Plug-and-Play (PnP). Windows or macOS will automatically recognize the device and install the required generic drivers in the background within a few seconds.**
- A small notification popup will appear stating *"Device is ready for use."***

Step 3: Open the Default Camera App

- On Windows: Open the Start Menu, type "Camera" in the search bar, and press Enter to open the built-in Windows Camera app.**
- On Mac: Press Command + Space to open Spotlight, type "Photo Booth", and press Return.**

Step 4: Verify and Capture a Photo

- 1. Once the app opens, you should see your live video feed on the screen.**
- 2. Look directly at the webcam lens.**
- 3. Click the Camera icon (on Windows) or the red camera button (on Mac) to capture a photo.**
- 4. Check the gallery thumbnail in the corner of the app to confirm the photo was saved successfully.**
